

**Product Code:** WA372

**Product Name:** SuperCiRoot Treatment Kit

**Product Information:**

SuperCiRoot Treatment Kit (WA372) can be used for protection of citrus crops.

**How to Use:**

**Seed Treatment:**

Measure out approximately 10-50 liters of water. Add all the kit contents of SuperCiRoot Treatment Kit and mix well till it becomes homogenized solution. To increase the sticking ability of the solution, add silicon based non-ionic wetting agent Warkem's SuperStiker® (WA306) at the rate of 50 ml per 100 liters. This solution is ready to use for citrus crops.

**Drip/Drenching:**

Add all the kit contents in 10 litre of fresh & clean water and mix well to get a homogenized solution. Add 90 litre of water to the above solution and make up the volume to 100 litre till homogenized solution is obtained. The mixture is now ready to use.

**Important Advice:**

- Once opened use the entire content or else store the unused product in the same bottle, with cap tightly closed.
- Avoid inhalation or direct contact of the product with skin.
- Wear appropriate protective clothing and rubber gloves while handling this product.
- In case of skin contact, wash the affected area and contaminated clothing with copious amount of water using soap.
- Strictly avoid eating, drinking or smoking while using this product.

**Storage & Shelf life:**

Store the product in a cool place away from direct heat and sunlight. Do not store the product along with food or animal feed. Empty containers should not be used for storage of any food products. Keep the product out of children's reach. Use before the expiry date mentioned on the label.

**Note:**

For Agricultural use only.

**Warranty:**

The use of this product is beyond our control, we only assure the uniform quality of the product. The company is not responsible for crop damage occurring due to usage other than recommended dosage, sudden changes in environmental conditions or any natural calamity.
