

Product: WA329**Product Name: SuperMykorrizA****Product Information:**

1. Mycorrhizal fungi are naturally-occurring, symbiotic and beneficial soil fungi that attach to plant roots and essentially become a living extension of the root system, dramatically expanding access to moisture and nutrients from the soil environment.
2. In return, the host plant feeds the fungi with sugars and other organic substances that the Fungi need to survive and grow.

Advantages:

- a. Improves plant root morphology and its development.
- b. Increases nutrient uptake in plants and mobilization of phosphate in all crops.
- c. Increase and facilitate nutrient uptake [elements like nitrogen, phosphorus, potassium, iron, manganese, magnesium, copper, zinc, boron, sulphur and molybdenum] and translocation from the soil through root cuticle parenchyma to different plant parts.
- d. Enhance product quality and increase immune power of the crop.
- e. Increased water uptake and greater drought resistance.
- f. Root colonization by AMF fungi provide protection to plants from parasitic fungi and nematodes.
- g. Increased seedling survival and faster growth.
- h. Improves soil structure.
- i. Survival in high soil temperature, soil toxins and extreme pH levels.

Target Crops: All crops**Recommended Dosage:** 100 G/Acre (3 lack IP/acre)**Recommended Applications:**

- Seed treatment
- Seedling treatment
- Drenching/Drip
- Soil application

Storage & Shelf-life:

Store the product in a cool dry place away from direct heat and sunlight. Use before the expiry date.
